Important Safeguard and Warning

All installation and operation here should conform to your local electrical safety codes.

We assume no liability or responsibility for all the fires or electrical shock caused by improper handling or installation.

We are not liable for any problems caused by unauthorized modifications or attempted repair.

Improper battery use may result in fire, explosion, or personal injury!

When replacing the battery, please make sure you are using the same model!

Note

All installation and operations should conform to your local electric safety rules.

1. Check Unpacked DVR

When you receive the DVR, please check whether there is any visible damage. The protective materials used for the package of the DVR can protect most accidental clashes during transportation. Then you can open the box to check the accessories.

Please check the items in accordance with the list on the warranty card (Remote control is optional). Finally you can remove the protective film of the DVR.

2. About Front Panel and Rear Panel

The model in the front panel is very important; please check according to your purchase order.

The label in the rear panel will contain the serial number. Usually we need you to present the serial number when we provide the service after sales.

3. HDD Installation

This series DVR has only one SATA HDD. Please use HDD of 7200rpm or higher.

Please follow the instructions below to install hard disk.

CAUTION

Shut down the device and then unplug the power cable before opening the case to replace the HDD.

1. Loosen the screws of the upper cover and side panel.

2. Fix four screws in the HDD.

3. Place the HDD in accordance with the four holes in the bottom.

4. Turn the device upside down and then turn the screws in firmly.

5. Connect the HDD cable and power cable.

6. Put the cover in accordance with the clip and then place the upper cover back. Secure the screws in the rear panel and the side panel.

Note:

You can connect the HDD data cable and the power cable first and then fix the HDD in the device.

Please pay attention to the front cover. It adopts the vertical sliding design. You need to push the clip first and then put down.

Front Panel – 4 channel and 8 channel

The front panel is shown in Figure 1.

Figure 1

Please refer to the following sheet for front panel button information.

Icon	Name	Function
STATUS	Status indicator light	The blue light is on when the device is working properly.

SN	Name	SN	Name	SN	Name
1	Video input	3	Audio output		
4	Audio input	5	Video VGA output		
6	HDMI port				
7	USB port	8	Network port		
9	RS-485 input port				
10	Power socket	11	On/Off button		
12	GND port				

Local Login

After system booted up, default video display is in multiple-window mode.

Click Enter or left click mouse, you can see the login interface. See Figure 3.

System consists of three accounts:

- Username: **admin**. Password: **admin**. (administrator, local and network)
- Username: **default**. Password: **default**. (hidden user) Hidden user “default” is for system interior use only and cannot be deleted. When there is no login user, hidden user “default” automatically login. You can set some rights such as monitor for this user so that you can view some channel views without login.

Note:

- For security reason, please modify password after you first login.
 - You can set to lock an account or not, password login attempt times, and account lock time.
-

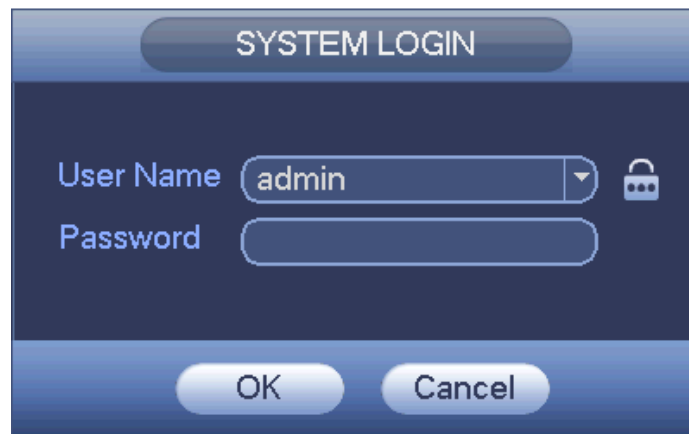

Figure 3

Open IE and input DVR address in the address column. For example, if your DVR IP is 10.10.3.16, then please input http:// 10.10.3.16 in IE address column.

The system pops up a warning to ask you whether to install webrec.cab control or not. Please click the yes button.

If you can't download the ActiveX file, please modify your IE security setup.

After installation, the interface is shown as below. See Figure 4.

Please input your user name and password.

Default factory name is admin and password is admin.

Note:

For security reasons, please modify your password after you first login.
